Education

Indian Institute of Technology (Indian School of Mines) Expected May 2027
Bachelor of Technology in Computer Science and Engineering *Dhanbad, Jharkhand*

Experience

Zeru – SDE Intern May 2026 – July 2026

- Built **backend data processing pipelines** handling **100K+ transactions**, improving anomaly detection accuracy by **25%**.
- Optimized **FastAPI endpoints and aggregation services** for internal dashboards, reducing reporting latency by **40%**.
- Reduced backend execution time by **approximately 30%** through query optimization and modular service workflows.

Technical Skills

Programming Languages: Python, C++, JavaScript, SQL.

GenAI & Agentic AI: LLMs, RAG, LangChain, LangGraph, Tool Calling, Structured Outputs, Prompt Engineering.

Backend & Databases: FastAPI, REST APIs, PostgreSQL, pgvector, Redis, Kafka.

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design, Cloud Computing.

AI APIs & Tools: OpenAI API, Gemini API, NVIDIA Nemotron API, Claude Code, Codex.

Projects

ShopScale | Repository Link

- Built a **Python/FastAPI e-commerce backend** using **PostgreSQL and SQLAlchemy**, with REST APIs for checkout, inventory management, and order processing.
- Prevented **inventory overselling** during concurrent checkouts using atomic PostgreSQL updates and transactions, with stock restoration on cancellation.
- Integrated **Kafka and the Transactional Outbox Pattern** for reliable order events, alongside idempotent payment handling and real-time updates via Socket.IO.
- **Tech Stack:** Python, FastAPI, SQLAlchemy, PostgreSQL, Redis, Kafka, Socket.IO, Docker

StackLens | Repository Link

- Built an **AI-powered platform** where users upload documents, ask questions, and receive cited answers; also added automated reviews of local code changes and GitHub pull requests.
- Implemented **RAG with LangGraph, OpenAI embeddings, and PostgreSQL/pgvector**, combining vector and keyword search to retrieve relevant content and verify answer citations.
- Developed an **AI code reviewer** to flag potential bugs and security issues, with severity ratings, suggested fixes, and guardrails that validate findings before optional GitHub inline comments.
- Built **FastAPI services** with account-isolated ingestion, Redis sessions, Kafka-based event-driven jobs, and observability for latency, token usage, and estimated API costs.
- **Tech Stack:** Python, FastAPI, LangGraph, OpenAI, PostgreSQL, pgvector, Redis, Kafka, Docker

Competitive Programming

- Solved **900+** DSA problems across **Codeforces**, **LeetCode**, and **GeeksforGeeks**.
- Achieved a global rank of **3256** in Meta Hacker Cup 2025 Round 2.
- Secured a global rank of **2678** in Codeforces Round 1055 (Div 2) Contest.

Achievements

- **Walmart Global Tech — Summer Internship:** Cleared all technical and coding rounds and the interview stage.
- Selected for **Google India's Student Upskilling Launchpad Program**.
- **First Runner-Up** — Agglomeration 2.0 Hackathon, CSE Department, IIT (ISM) Dhanbad.

Positions of Responsibility

Organiser — Concetto'25, Annual Tech-fest of IIT (ISM) Dhanbad
Organiser — FotoMela Photography Fest & Bloodline (Fast Forward India NGO)
Member — FotoFreaks, Photography Club of IIT (ISM) Dhanbad
